PROFILE

I am a dedicated software engineer with over 19 months of professional experience, specializing in front-end development. With a strong background in web development through three internships and 1 year of professional work, I excel in creating intuitive, user-friendly interfaces. I am seeking a new opportunity in IT to leverage my technical skills and interpersonal abilities, and to contribute to innovative projects that drive business success.

SKILLS

- Problem Solving: Debugging and resolving complex issues
- Collaboration: Working in cross-functional teams, peer support
- Project Management: Agile methodologies, Scrum
- Communication: Effective written and verbal communication skills

EDUCATION

Engineering degree in Computer Engineering and Networks.

Ecole Marocaine Des Sciences De l'Ingénieur - EMSI

2018 - 2023

WORK EXPERIENCE

Front-End Developer

Forvis Mazars July 2023 - Present

- Developed and maintained web applications using Vue.js, improving performance and user experience.
- Successfully contributed to 5 major projects, currently working on the 6th, ensuring timely delivery and high-quality code.
- Collaborated with cross-functional teams to design and implement new features, enhancing product functionality and user engagement.
- Utilized Vuex for state management and Element Plus for UI components, ensuring seamless and responsive design across various devices.
- Debugged and resolved complex front-end issues, enhancing the overall stability and performance of applications.
- Implemented responsive design principles to create mobile-friendly web applications, leading to an increase in mobile user engagement.
- Conducted code reviews and provided mentorship to junior developers, fostering a collaborative and productive team environment.
- Assisted coworkers with troubleshooting and completing their tasks, promoting a collaborative and supportive work environment.
- Developed reusable components and optimized code to improve development efficiency and maintainability.

Front-End Developer Intern

FeverTokens March 2023 - July 2023

- Developed a blockchain wallet using Next.js, TypeScript, and Web3.js, facilitating secure and efficient transactions for users.
- Revamped an outdated codebase, significantly enhancing developer experience (DX) and improving the overall user interface and user experience (UI/UX), resulting in a more intuitive application.
- Contributed to the development of a console project enabling users to create custom web3 marketplaces, expanding the platform's functionality.
- Actively collaborated with team members on design and implementation decisions, ensuring cohesive and well-integrated solutions.
- Provided proactive support and assistance to team members, fostering a collaborative environment and contributing to the overall success of projects.
